## 4-D Ultrasound

at Sumner Regional Medical Center

### Frequently Asked Questions

**When is the best time to have the 4-D Ultrasound?**

The 4D Ultrasound can be done from 25-32 weeks. The BEST time is 26-28 weeks.

**When can the sex of my baby be determined?**

The sex of your baby can be determined at 20 weeks gestation. However, there are some factors beyond our control such as fetal position, gestational age, etc.

**Will my doctor receive a report?**

This ultrasound is not a diagnostic scan, so your physician will not receive a report.

**Will my insurance pay for this sonogram?**

Insurance does not cover the cost of this sonogram.

**Who will perform the sonogram?**

Your sonogram will be performed by a certified ultrasound tech.

**Do I need a full bladder for this sonogram?**

If you are 22 weeks or over, you will not need a full bladder.

**How many people can I bring to the sonogram?**

Only 3 additional people will be allowed in the room at one time during the scan.
